The past three years we have been turning our nursery plant to the growing of shrubs for the wholesale trade and to close out and discontinue the growing of fruit stocks, we offer the following stocks at very attractive prices to market growers.

At these prices we can't be bothered with small orders for many varieties. We expect cash with the order or a sufficient payment to insure that the stock will be taken and balance paid for upon delivery.

We guarantee these Apple and Plum Trees to be absolutely free from BLACK-HEART. *The Apple orchard in Wisconsin is mighty short lived for the reason that only 3 year old 5 to 7 foot black-hearted trees are planted. The farmer can keep up such orchards by annually buying and planting a few apple trees. It is not very profitable for the commercial apple grower to grub out and replant his orchard every 12 to 15 years, just as it has come into very profitable age.

We cant accept small order for many varieties at the prices quoted.
